\*\* The volume of mls of water to which 1g of the product is to be added.

NOTE: Dilution rates for disinfectants for use against Foot and Mouth Disease and/or Swine Vesicular Disease relate to effectiveness when applied to a clean surface.

- (a) thoroughly washed or sprayed with an approved disinfectant;
- (b) thoroughly cleansed, ensuring that dung, litter, etc. is removed and disposed of so that there is no risk of contact with livestock; and
- (c) (the clean area) washed or sprayed with an approved disinfectant used at the approved dilution.

### PTO

- A dirty surface must be cleaned before it can be satisfactorily disinfected because dirt may make the disinfectant useless
- Users are reminded that many of the products listed will contain hazardous chemicals and the Control of Substances Hazardous to Health Regulations (COSHH) will apply.
- Those marked with an asterisk are classified as toxic/very toxic or contain compounds which may cause asthma-extra care is needed in the way these are used.

- Use all disinfectants according to the manufacturer's health and safety recommendations on the label and/or the safety datasheet. Wear the recommended personal protective equipment.
- Spraying disinfectants results in whole body exposure-use the personal and respiratory protective equipment recommended by the supplier. Avoid exposing unprotected people (e.g. lorry drivers, bystanders, etc) to disinfectant spray.
- Details on suppliers of approved products may be obtained directly from proprietors.
